REGISTERING FOR YOUR EXAM

Registration

1. Log in to your [Credentials](#) account using your existing USGBC® site user account or [creating a new account](#) if you do not have one.
2. Verify that the name you enter in matches the name on the ID you will present at the test center. If it does not match, please update your name in your [site user account](#) “settings.” This may be of special concern to candidates who use more than one name (e.g., individuals who use a nickname or those who use different names in different regions). Please update your name with GBCI® at least 5 days prior to your exam. [Contact GBCI](#) if you experience issues updating your name.*
3. Select the LEED® AP HOMES exam under the credentials section and follow the instructions on the screen to complete the application.
4. You will be redirected to prometric.com/gbci to schedule your exam date and location.
5. When the exam appointment is scheduled, you will receive a confirmation number onscreen and from Prometric through an email.
6. Record your confirmation number. You will need this confirmation number to confirm, cancel or reschedule your appointment through the Prometric website, prometric.com/gbci.
7. Once you have scheduled an exam, please print your confirmation notice from Prometric. Keep your confirmation notice for any communication with Prometric about your exam.

Once you register and pay for your exam, you have one year to schedule your exam session. Upon taking your exam, if your attempt was unsuccessful you may register again in the same way as initial registration. After three unsuccessful attempts, however, you must wait 90 days before submitting a new registration to GBCI. Candidates must pay the registration fee for each exam attempt.

Learn about [GBCI's exam refund/rescheduling policy](#).

To schedule five or more candidates at one time, [contact customer service](#).

*If your native language utilizes non-Roman characters, be sure to enter your name in Roman characters when you register for the exam. Make sure to bring identification, such as a passport that includes your name in Roman characters, to [the test center](#).

Eligibility Requirements

For the LEED AP with specialty exam, prior LEED project experience is strongly recommended. Candidates must be 18 years of age or older and must hold a current LEED® Green Associate™ credential.

Practitioner experience is critical to earning the LEED AP HOMES credential and, as such, project proficiency will be tested objectively within the exam

All candidates must also agree to the [Disciplinary and Exam Appeals Policy](#) and credentialing maintenance requirements, and, if audited, must be willing to provide requested information.

Audits

GBCI reserves the right to conduct an audit at any time (including prior to application submission and after credential has been granted) of all current and past exam applications. Any information contained in your [Credentials](#) account may be audited and a request for further documentation of any information or claims submitted by the LEED professional may be made at any time. GBCI further reserves the right to take disciplinary or legal action—including but not limited to revocation of credential(s)—in the event that any conduct discovered during such an audit violates the LEED professional [Disciplinary and Exam Appeals Policy](#), GBCI policy and/or law.

Testing Accommodations

If you have a documented disability that would prevent you from taking a LEED professional exam under normal testing conditions, you may request accommodations. GBCI complies with the provisions of the Americans with Disabilities Act (ADA). Under the ADA, entities that administer standardized examinations must offer the examinations in a place and manner that is accessible to candidates with disabilities. This may require reasonable modifications to the manner in which the exam is administered. Prometric, GBCI's exam delivery company, will provide candidates reasonable auxiliary aids and services, except where it may fundamentally alter the validity of the exam results. Available accommodations include, but are not limited to, a reader, a scribe and extended testing time.

If you require testing accommodations, you must indicate this during your registration process by checking the box that says "Yes, I need testing accommodations." To request accommodations, you and your health care provider will each need to complete one form, the [Candidate Form](#) and the [Provider Form](#), to document the disability and the need for accommodation. There is no additional charge for testing accommodations. Each request will be evaluated individually.

GBCI will review this documentation and, if approved, will alert Prometric of the necessary accommodations. If proper documentation is submitted, please allow up to two weeks to receive a reply from GBCI. Once you have requested testing accommodations, you will not be able to schedule an appointment with Prometric until your request is approved. You will be contacted by email regarding the approval status of your testing accommodations request.

Exam Fees

See the [exam](#) page on the USGBC website for pricing. Your paid exam fee is good for only one exam attempt.

For USGBC members to receive member pricing for your exam, please [link your member status](#) to your USGBC account prior to registration.

GI Bill Benefits

The LEED professional exams have been approved by the U.S. Department of Veterans Affairs for reimbursement. The VA, in accordance with the GI Bill, has agreed to reimburse veterans, active service members, eligible dependents, spouses and reservists for the cost, up to \$2,000, of any of the LEED professional exams administered by GBCI since December 3, 2009. [Learn more.](#)

THE EXAM

Exam Development

A LEED AP with specialty credential holder possesses the knowledge and skills necessary to support the LEED certification process. The development of a valid exam begins with a clear and concise definition of the knowledge, skills and abilities needed in order to successfully perform the job of a LEED AP with specialty. All LEED exams are developed by a global network of Subject Matter Experts and meet the specifications of a job analysis. The exam specifications are subject to rigorous validation by these experts, which ensures that the exam is valid, measuring what it is intended to measure. Once the exams are launched the exam questions are regularly monitored to ensure continued reliability.

The exams assess candidates' abilities at three cognitive levels: Recall, Application and Analysis.

- **Recall Questions:** These questions assess a candidate's ability to recall factual material that is presented in a similar context to the exam references.
- **Application Questions:** These questions provide the candidate with a novel problem or scenario that the candidate can solve using familiar principles or procedures described in the exam references.
- **Analysis Questions:** These questions assess a candidate's ability to break the problem down into its components to create a solution. The candidate must not only recognize the different elements of the problem, but must also evaluate the relationship or interactions of these elements.

Exam Format

The LEED AP with specialty exam contains 100 randomly delivered multiple choice questions and must be completed in 2 hours.

Candidates who have a current LEED Green Associate credential can register for the specialty-only portion of the exam and do not need to sit for the entire combined exam. Please be aware that the option to take the combined exam in one sitting is not available in all languages and at all test centers. If you cannot find the option to register for a combined LEED AP exam, please register for the two core parts separately.

The exam has both scored and unscored questions. All questions are delivered randomly throughout the exam and candidates are not informed of a question's status, so candidates should respond to all the questions on the exam. Unscored questions are used to gather performance data to inform whether the question should be scored on future exams.

The exam is computer-based. Exam questions and answer options are displayed on screen. The computer records your responses and times your exam. You are able to change your answers, skip questions and flag questions for later review.

During the exam, candidates may submit comments on any question(s) they believe to contain technical errors in content by using the comment button located in the navigation bar. In order to challenge an exam question, the candidate must have commented on the question and provided an explanation of their concerns. After the exam, [inform GBCI](#) that you have left comments on your

exam; in your correspondence, be sure to note the email address used to sign up for the exam, as well as the date on which you took it. You must notify GBCI within 10 days of your exam date that you have left comments within your exam.

Be prepared to commit 2 hours 20 minutes for a specialty-only exam and 4 hours 20 minutes for a combined exam. Total exam time is broken out as follows:

- For a specialty-only exam, an optional 10 minute tutorial, the 2 hour exam and an optional 10 minute exit survey.
- For a combined exam, an optional 10 minute tutorial, the 2 hour LEED Green Associate exam, the 2 hour specialty exam and an optional 10 minute exit survey. Be aware that if a candidate exits the exam session before completing the exam, the exam cannot be restarted and the exam session and fee are forfeited.

Exam Language

The LEED AP HOMES exam is currently only available in English.

Exam Maintenance

Each year, LEED professional exams are updated on July 1. Exams go through a maintenance process where the questions are evaluated based on performance; poorly performing questions are removed and replaced with new questions. Additionally, questions are reviewed against LEED addenda published through January of the same year to ensure that all questions remain current and valid. Please check the [References](#) section of the handbook for the most current list of exam references.

Exams are not offered from June 23 - June 30 of each year in order to accommodate deployment of updated exams at test centers globally.

PRE-EXAM CHECKLIST

Are You Ready?

One Month Before Your Exam

Ensure that your given name (first name) and surname (last name) in your usgbc.org account matches the given name and surname on the identification you will present at the test center. (See next page.) **If the names do not match, you will not be allowed to test and you will forfeit the exam fee.**

One Week Before Your Exam

Confirm that the date, time and location of your exam is correct. If it is not, please visit usgbc.org for information about rescheduling or canceling your exam.

Exam Security

To ensure the integrity of the LEED professional exams, you will be required to review and accept a nondisclosure agreement that prohibits any disclosure of exam content:

- Exam questions and answers are the exclusive property of GBCI.
- The exam, questions and answers are protected by copyright law. The exam may not be copied or reproduced in part or in whole, by any means whatsoever, including memorization.
- Future discussion or disclosure of the content of the exam, orally or in writing, or by any other means, is prohibited.
- Theft or attempted theft of exam questions is punishable to the fullest extent of the law.
- Failure to comply with the agreement will prevent you from testing.

What to Expect at the Test Center

It is recommended that you arrive at the test center at least 30 minutes prior to your scheduled exam appointment. Candidates who arrive at the test site after their scheduled exam time will lose their seat.

You will be escorted to a workstation by test center staff. You must remain in your seat during the exam except when authorized to leave by test center staff. Raise your hand to notify test center staff if:

- You experience problems with your computer
- An error message appears on the computer screen (do not clear the message)
- You need to take a break (testing time will NOT be suspended)
- You need the test center staff for any other reason

Identification Requirements

Candidates must provide a valid, unexpired ID with a signature, a photograph that looks like the candidate and an expiration date. Acceptable examples include:

- Current government-issued photo ID with signature
- Current credit card photo ID with signature
- Current photo ID without signature plus 1 credit card with signature—first and last names must match on both

Examples of acceptable forms of unexpired photo ID include, but are not limited to:

- Driver's license
- Passport
- Military ID
- Green card, permanent residence card, or H-1B visa*

**If the ID has a picture but no signature, it must be provided with a form of signature ID (e.g., a credit card) in the same name.*

See [Prometric's website](#) for more information.

Unacceptable forms of ID include, but are not limited to, an expired ID, an ID without an expiration date and a Social Security Card.

Test Center Regulations

You must abide by Prometric's security rules while at the test center. See [Prometric's FAQs](#) for more information.

Grounds for Dismissal from the Test Center

Any candidate who engages in misconduct or does not comply with the test proctor's warning to discontinue inappropriate behavior may be dismissed from the test site, have exam results invalidated or be subject to other sanctions. Fraud, deceit, dishonesty or other irregular behavior in connection with taking the exam is strictly prohibited.

GBCI will make a ruling based on the consideration of both the candidate's report and Prometric's report of the incident. To appeal GBCI's ruling, [send an email](#) of your formal appeal to GBCI. At this stage, the Credentialing Steering Committee will review and make a final ruling on the case.

AFTER YOUR EXAM

Exam Results

All LEED professional exams are scored between 125 and 200. **A score of 170 or higher is required to pass.** Your exam score will be displayed on screen at the end of the exam and a score report will be emailed to you following your exam session. **For the LEED AP combined exams, you must earn a 170 or higher on both parts within the same application period to earn the credential.**

Within 72 hours of your appointment, your exam results will be processed, your [Credentials](#) account will be updated and, if applicable, your badge will be updated in the [usgbc.org People directory](#).

Passing the Exam

Designating Your Credential

As soon as you have passed the specialty exam, you must use the title “LEED AP®” followed by your specialty and/or the corresponding logo(s). For example: LEED AP® BD+C, LEED AP® O+M, LEED AP® ID+C. The term “LEED Accredited Professional” is never to be used.

You should no longer use LEED Green Associate as the LEED AP with specialty credential supersedes the LEED Green Associate credential.

Please review the LEED professional credentials section of the [USGBC Trademark Policy and Branding Guidelines](#) for additional guidance.

Certificates

Once your exam results have been processed, you can download a copy of your certificate through your [usgbc.org account](#).

Credential Maintenance Program

For information on credential maintenance, see the [CMP Guide](#).

Earning the LEED AP with specialty after the LEED Green Associate

Your LEED Green Associate credential expires and is replaced by the LEED AP with specialty.

Exam Content Appeals

Because of the need for exam security, GBCI will not release exam questions or answers to candidates. GBCI does not respond to complaints or challenges received more than 10 days after the exam date and does not respond to complaints sent to organizations other than GBCI. GBCI will review the questions and you will be notified of the findings.

GBCI does not modify exam scores under any conditions. In the event of a successful exam content appeal, you will be given the opportunity to retest; your score will not be changed. The only way to earn a LEED professional credential is to earn a 170 on the required exam(s).

Candidate Confidentiality

GBCI recognizes your rights to control personal information. GBCI policy is designed to safeguard this information from unauthorized disclosure. You can change your preference to be contacted by updating your personal preferences in your [usgbc.org](https://www.usgbc.org) account.

To protect your rights to control score distribution, exam scores are released only to you, the exam taker, and authorized GBCI staff. GBCI does not release exam scores except for use in research studies that preserve your anonymity. Candidates' scores will always remain confidential unless released with written consent of a candidate.

Official statistics regarding the LEED professional exams, including all question performance data, individual data and demographic data, will be considered confidential; however, GBCI may publish aggregate, non-identifying information based on such data.

EXAM SPECIFICATIONS

Specifications

The following outline provides a general description of exam content areas for the LEED AP HOMES exam.

Knowledge Domains reflect the rating systems' credit categories and what one needs to know. These include concepts such as LEED Process, Integrative Strategies, LEED credit categories and Project Surroundings and Public Outreach.

LEED AP HOMES Exam

The LEED AP HOMES specialty exam tests the knowledge and skills necessary to participate in the design process, to support and encourage integrated design and to streamline the application and certification process.

► Knowledge Domains

1. LEED Process (9 Questions)

- A. LEED verification process
- B. Roles and responsibilities of verification team (e.g., green rater; energy rater; quality assurance designee)
- C. Certification submittal requirements (e.g., to GBCI)
- D. Project eligibility (e.g., which rating system to use—Homes, Midrise or New Construction)
- E. In-field verification requirements (e.g., performance test; visual inspection)
- F. Resources for LEED Interpretations and Regional Priority Credits
- G. LEED system synergies (e.g., energy and IEQ; waste management)
- H. Project boundary; LEED boundary; property boundary
- I. Prerequisites and/or minimum program requirements for LEED certification
- J. LEED Online
- K. Integrative process (e.g., communication between project team and verification team throughout design and construction; communication of LEED goals and requirements to multidisciplinary team members including trade contractors)

2. Location and Transportation (9 Questions)

- A. Floodplain avoidance (e.g., general requirements for new construction and renovation)
- B. LEED ND as a pathway in the Location and Transportation category

- C. Site selection definitions:
 - i. Sensitive land
 - ii. Infill development
 - iii. Open space
 - iv. Street network
 - v. Bicycle network and storage (e.g., general requirements)
- D. Compact development (e.g., metrics associated with compact development)
- E. Community resources (e.g., distance and measurement):
 - i. Define qualifying community resources
- F. Access to transit (e.g., distance to and frequency of trips)

3. Sustainable Sites (9 Questions)

- A. Construction activity pollution prevention (e.g., erosion control; storm water management; air pollution prevention)
- B. Invasive plants (e.g., intent and prerequisite status)
- C. Heat island reduction (e.g., shading use; nonabsorptive materials)
- D. Rainwater management (e.g., examples of low impact development techniques)
- E. Nontoxic pest control (e.g., how to achieve credit)

4. Water Efficiency (10 Questions)

- A. Types and quality of water (e.g., potable; graywater; blackwater; stormwater)
- B. Indoor and total water use:
 - i. Testing for water leaks (e.g., total and indoor water use)
 - ii. Define shower compartment
 - iii. Water sense label interior fixtures
- C. Outdoor water use (e.g., general requirements: decrease turf grass and increase native plants)
- D. Irrigation demand (e.g., evapotranspiration; landscape coefficient; rainwater harvesting and storage; graywater reuse; municipal recycled water systems)

5. Energy and Atmosphere (17 Questions)

- A. Energy performance policies (e.g., ENERGY STAR thermal bypass checklist; HERS Index; building orientation)

- B. Building components (e.g., required systems; building envelope; HVAC; service water heating; power; lighting; lighting power density; receptacle load; insulation; windows, SIP and ICF construction techniques)
- C. On-site renewable energy (e.g., wind; solar; passive solar; geothermal; biomass; low impact hydro; biogas)
- D. Third-party relationships/requirements (e.g., prescriptive and performance paths for energy efficiency; LEED for Homes Green Rater; HERS Rater; energy testing and on-site verification requirements)
- E. Third-party alternate rating systems (e.g., HERS or alternative compliance path)
- F. Energy performance measurement (e.g., ENERGY STAR Thermal Bypass Inspection Checklist; ACCA Manual J; ACCA Manual D)
- G. Energy tradeoffs (e.g., integration and identification of tradeoffs in energy savings between mechanical, electrical, and building components; lighting design that considers energy use reduction and lighting power density relationship with daylighting)
- H. Energy usage (e.g., building schedules; occupancy and off-hours; indoor/outdoor air usage rates and impact on energy performance)
- I. Minimum energy performance (e.g., general requirements to meet ENERGY STAR for Homes; what projects need to be commissioned; processes)
- J. Energy metering (e.g., metering requirements for single and multifamily projects)
- K. Education of homeowner, tenant or building manager (e.g., content and distribution requirements for operations and maintenance manual; walk through requirements)
- L. Annual energy use (e.g., which option includes the home size adjuster; definition of LEED energy budget; minimum energy requirements for midrise; conditioned floor area of ENERGY STAR v3 reference home by number of bedrooms)
- M. Efficient hot water distribution system (e.g., multifamily central circulation system; performance testing; insulation)
- N. Advance utility tracking (e.g., options for tracking and reporting energy and water use)
- O. Active solar-ready design (e.g., photovoltaic-ready design; solar direct hot water-ready design)
- P. Home size adjuster as a prerequisite for EA prescriptive path
- Q. Building orientation for passive solar (e.g., basic credit requirements)
- R. Air infiltration (e.g., who performs the test and what is the test)
- S. Envelop insulation (e.g., R-value; 2012 International Energy Conservation Code)
- T. Windows (e.g., view factor; SHGC; window area and stringency)

- U. Space heating and cooling equipment (e.g., required duct leakage rate)
- V. Heating and cooling distribution systems (e.g., ductwork in conditioned space; ductwork in unconditioned space; hydronic systems; who conducts the duct leakage test)
- W. Efficient domestic hot water equipment (e.g., list of qualifying systems)
- X. Lighting (e.g., lighting power density; dark skies)
- Y. High-efficiency appliances (e.g., types that qualify for credit)
- Z. Renewable energy (e.g., certificate retention; maximum points allowed)

6. Materials and Resources (10 Questions)

- A. Building reuse (e.g., gut rehabilitation; material reuse)
- B. Material acquisition (e.g., certified wood; recycled content; detailed framing documents and cut list/lumber order)
- C. Certified tropical wood (e.g., definition)
- D. Durability management (e.g., requirements of ENERGY STAR for Homes v3 check list; indoor moisture control measures)
- E. Durability management verification (e.g., requirements)
- F. Environmentally preferable products (e.g., recycled materials pre-consumer; post-consumer; collection requirements; commingled and locally—regionally—harvested and manufactured materials)
- G. Construction waste management (e.g., accounted by weight or volume; reduction strategies; baseline for LEED reference home)
- H. Material-efficient framing (e.g., applicable strategies; thresholds)

7. Indoor Environmental Quality (13 Questions)

- A. Minimum ventilation requirement (e.g., indoor air quality; natural ventilation; mixed mode ventilation)
- B. Combustion venting general requirements (e.g., no unvented combustion appliances; CO monitors; fireplace measures)
- C. Garage pollutant protection (e.g., seal, weather-strip and install carbon monoxide detectors; EPA Indoor AirPLUS Label)
- D. Radon-resistant construction (e.g., EPA radon zone 1; radon resistant construction techniques; requirements for renovation of existing building)
- E. Air-filtering (e.g., where filters are required)
- F. Environmental tobacco smoke (e.g., no smoking option; multifamily - no smoking requirements)

- G. Compartmentalization (e.g., intent; strategies; verification of)
- H. Enhanced ventilation (e.g., strategies that qualify for enhanced ventilation controls; systems that qualify for enhanced whole-house ventilation)
- I. Contaminant control (e.g., strategies including walk off mats; shoe removal and storage; preoccupancy flush or EPA Indoor AirPLUS label and air testing - max contaminant concentrations)
- J. Balancing of heating and cooling distribution systems (e.g., basic requirements of Case 1 - Forced-Air Systems; Options 1-3; Case 2 - Radiative Systems, Options 1 and 2)
- K. Combustion venting (e.g., EPA certified equipment or no fireplaces or woodstoves)
- L. Enhanced garage pollutant protection (e.g., credit awarded for either exhaust fan or no garage/detached garage)
- M. Low-emitting Materials (e.g., adhesives and sealants; paints; coatings; carpet; composite wood and agrifiber products; VOC's; urea-formaldehyde, California standard 1350)

8. Innovation (5 Questions)

- A. Preliminary rating (e.g., who needs to be at the preliminary rating, prerequisite status in rating system and goals of preliminary rating)
- B. Innovation (e.g., Innovation, Pilot, and Exemplary Performance strategies)
- C. LEED AP® (e.g., specialty appropriate for the project)

9. Regional Priority (3 Questions)

- A. Regional Priority Credits - What are they and how to find them.

The exam contains 15 unscored questions.

References

The primary sources for the development of the LEED professional exams are the LEED Rating Systems. The following list of references are not meant to be comprehensive. When combined with the exam specifications, the candidate has the material from which the exam is based.

LEED AP HOMES Exam

This exam is designed to test the knowledge and skills necessary to participate in the design process, to support and encourage integrated design and to streamline the application and certification process. You should also be familiar with the content of the U.S. Green Building Council®'s website, usgbc.org, and GBCI's website, gbc.org, including, but not limited to, LEED project registration, LEED certification content and the purpose of LEED Online. [USGBC's website](http://usgbc.org) also has free access to all LEED rating systems, LEED Reference Guide introductions and checklists beyond those listed above.

Sample Questions

Disclaimer: The exam questions listed here were discarded in the process of creating questions for new exams.

The questions are provided for your convenience to allow you to better familiarize yourself with the format and general content of questions on exams.

The content of these questions, while representative of the type of questions you can expect, does not necessarily mirror the content that will appear on the actual exams.

Furthermore, your ability to correctly answer these sample questions does not in any way predict or guarantee your ability to successfully answer questions on the actual exams.

LEED AP HOMES Sample Questions

1. What is the PRIMARY intent of Innovation Prerequisite: Preliminary Rating?

- (A) To define the credits that could be achieved easily and cost effectively.
- (B) To define target certification level at the beginning and declare it to all parties.
- (C) To maximize opportunities for integrative, cost effective adoption of green design and construction strategies.**
- (D) To encourage exceptional performance for current credits and promote innovative performance in pioneering areas.

This question represents Knowledge Domain 8A: Innovation; Preliminary rating (e.g., who needs to be at the preliminary rating, prerequisite status in rating system and goals of preliminary rating).

2. Regional Priority Credits focus on which of the following types of environmental issues?

- (A) Naturally occurring issues
- (B) Man-made issues
- (C) Environmental concerns and assets**
- (D) All of the above

This question represents Knowledge Domain 9A: Regional Priority: Regional Priority Credits - What are they and how to find them.
